Charger Rack

Charger for eight Aastra 142d

Generally people expect mobility and reachability from their employees independent from the environment they happen to work in. Using Aastra's cordless DECT telephone Aastra 142d ensures this reachability. They can cover large premises and work reliably even under rough conditions.

For employees without a fixed work place – e.g. working in hospitals or department stores etc. – it is a basic requirement for their availability to have a cordless telephone continually at hand.

Installing a Charger Rack with handsets in a central position can offer employees conveniently positioned fully charged phones, continually on stand-by, for all to use. The handsets can be personalized via individual PINs'.

The Charger Rack can be set on a table or wall mounted.

The Charger Rack is approved for use in the EU.

Dimensions/colour:

- W x H x D (mm): 667 x 133 x 100
- Colour: black

Charger Rack with handsets (not included in the delivery content)
